Locking the scraper - cutter

“Cut&Mix” Scrapers CK / K / KE

To obtain a more homogeneous final product.

- Manual scraper which allows more homogeneous product to be produced and avoids overheating.
- To return the product from walls and lid back into mix.
**Step 1**

Note there is a notch and a groove for to secure the handle to the scraper.

**Step 2**

Place the scraper into the opening on the plastic lid so the handle notch fits into the scraper groove.

**Step 3**

Turn the handle to the left until it stops, about 1/4 turn.

**Step 4**

Pull the scraper down from the handle creating a gap; this locks the handle to the scraper.
